Certificate change QC to Steve Greig
Creating of Certificate based on Users Default Manufacturing Location

JDSU CALIBRATION MANAGEMENT SYSTEM 1.0.2
UPDATES AND MODIFICATION

August 29, 2013

Add Tutorial per Page/Module
-The user can view each form of the system by viewing the help icon and they can view how it works.
Add Serial Number Column on Test Stand List Report
-If the user going to list all the report in Test Stand it will be added the serial number. Because in version 1.0.1 it's only Asset tag #, Model, Manufacturer, Description, Cal Date and due date.
Manage Test Stand
-Add view icon on Manage test stand so the user can view the basic test stands information.
-Map Test Stands to Asset becomes Map Asset to Test Stand.
-Map Test Stands to Product changed to Map Product to Test Stand.
-In adding Asset Tag #, add serial number on the list.
-In related information each window set 25 entries only per page/window.
   -Remove the "Manufacturer" on the list of adding the product in Map Product to Test Stand. Then it shows only the Product, Description and Vendor.

JDSU CALIBRATION MANAGEMENT SYSTEM 1.0.1
UPDATES AND MODIFICATION

August 16, 2013

Certificate list:
-Same serial number is not allowed

Asset List:
-Renamed MPC Asset list to Asset list.
-Added a new drop down to filter data by Manufacturing Site.
-Added new fields upon creating an asset:
    -NCR (No Calibration Required)
    -Replacement Cost
-Added Certificates associated on view assets.

-Added Map Asset to Test Stands on view assets.

Renamed the following on the Asset list:
-Manufacturer to Brand.
- Product to Model.

Manage Test Stand:
-Change Test Stand name to Test Stand ID.
-Add Map Test Stand to Product.
-Add Asset Tag # Field.
-Additional Information about Floor Location, Asset Tag #, In Adding Test Stands.

Add/Edit Manufacturing:
-Manufacturing Location to Manufacturing Site.
-In Manufacturing Site removed the billing address and shipping address.

Add/Edit Customer:
-Remove the View Details in Customer Form.
-For adding customer, the billing information and shipping information will remove and change it to Basic Information only such as Customer and Manufacturing Site.
-After saving/deleting, it will go back to list of customers.
-Remove view details column, instead if the user don't have rights on edit customer, edit button will be replaced by view button.
-Table content alignment.
-Remove other fields on add/edit except for customer name, instead the customer will have a multiple manufacturing site.

Add/Edit Manufacturer:
-Remove Manufacturer Form.

Add/Edit Products:
-The user can view the Product Details.
-Description Field for Additional Information in adding product.
-After saving/deleting, it will go back to list of products
-Table content alignment

User Account Management:
-Additional Information on the form of Employee Management which is the profile. It will display to the Employee Management Form.
-Basic Information only for Add/Edit Employee.

System Report:

-Changes on the following reports you will now have an option to select a download type from pdf, xls, html or java.

    -Certificate list report

    -Asset list report

-Added a new report "Test Stand list report" will display the test stand report that will be based from the vendor selected
